

## Vintage Gardens New Crop Third Release—November 22nd, 2011

We welcome you to our new crop for the Fall of 2011. This listing is our third release of varieties propagated this past summer, 2011. Roses on this list are just newly propagated items. Please see our complete availability list now online to download from our website. Many items on this list may not be available to ship before March of 2012. Items marked VI or VID have been virus indexed and are free of Rose Mosaic Virus.

We will offer one more release of varieties in March of 2012, which will include the bulk of our old European rose propagation for this year. Please remember that you may add to orders that have not shipped to you yet, so long as you can give us a week from the time we receive your additions to the time that we ship them.

Please consult our website for current availability. Roses sell out daily and even hourly from this printed list. Our production for 2012 will be limited; this will be the last opportunity you will have to obtain many of the roses that we grow at Vintage Gardens. In 2013 we will cease our operations. Thank you, Gregg Lowery, Vintage Gardens
